

Affordable Clean Energy through Collective Action

Just for YOU

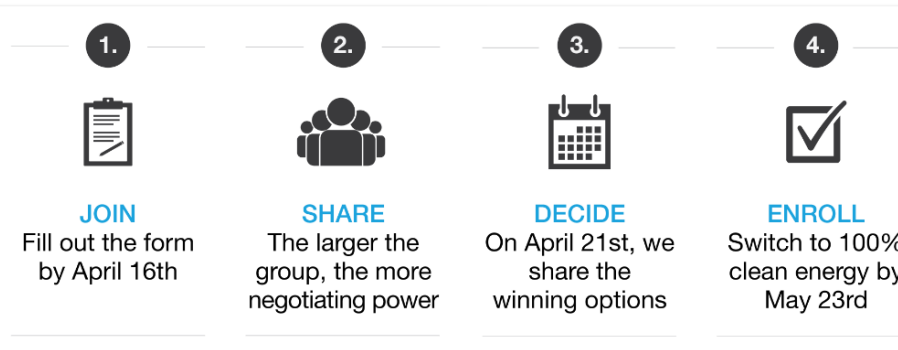

This Spring, non-profit Groundswell and their partners are bringing a group of people together to negotiate on their behalf for affordable, clean energy.

- You have the power to choose your electricity supplier.
- You still receive the same utility electricity bill and service.
- Groundswell vets and screens energy suppliers to ensure you get a fair contract and quality customer service.
- By switching to 100% wind power through Groundswell, people paid 16% less than if they switched on their own.
- PLUS a \$10 donation back to **Emmanuel UMC** per enrollment
- This program is open to any Pepco, BGE, and Potomac Edison customer.

Groundswell and their partners have brought together over 160 community organizations and 1,600 people. **Emmanuel UMC** already switched to 100% wind power through their group. Add your name to the list of people supporting clean renewable energy and combating climate change!

Make the Switch...

Groundswell negotiates on your behalf to provide you affordable, clean energy. Here are the 4 simple steps:
