

WIND POWER

Switch to 100% clean, renewable wind power for your home

Groundswell's nonprofit team of experts have chosen WGL Energy, a local energy supplier, to offer you an affordable option for 100% wind power for your home. The process to enroll is easy: there's no equipment to install and you'll still receive one electric bill each month.

HOW IT WORKS

- This process is entirely online - there is no signup fee or equipment to install.
- You enroll with our preferred partner for a one or two year fixed rate contract. Your rate is locked in for the term of your contract.
- Your utility continues to bill monthly and is responsible for power outages.
- For the average Maryland home, Groundswell's wind power option only costs about \$10 extra per month. (based on usage of 1,000 kwh/month)

YOUR IMPACT

Switching to wind power reduces your carbon footprint. It's equal to planting 177 trees.

It's one of the easiest ways you can contribute to the fight against climate change.

Visit <http://www.groundswell.org/energy> to access our rates.

Be sure to indicate the name of your organization as the referring partner so they get credit. You'll need your utility bill to complete the sign-up process. Call Groundswell (202-753-9672) for assistance.

Groundswell and our partners have brought together more than 400 community organizations and 10,000 people to join in group purchases of wind power over the past seven years. We are a nonprofit organization committed to organizing community power by engaging with racially and economically diverse communities around equitable ways of joining the clean energy economy. We work vigorously to meet our people where they are, linking value to values and facilitating opportunities to both impact their own family's bottom line while fundamentally altering the trajectory of the communities they live in. By empowering our community to choose between 100% clean, renewable energy sources such as solar or wind power as well as expanding access to needed energy efficiency resources, Groundswell is turning everyday purchases into meaningful drivers of social change.
