

WGL Renewal Information

Steps to take when you receive your renewal notice for 100% wind from WGL

- Call 1-844-4ASKWGL (1-844-427-5945) to discuss your **renewal** rate. Tell them that you would like the Groundswell discounted rate, found here: <https://one.wglenergy.com/cmp/groundswell/>
- When they respond:
 - **If you like the new rate**, renew for a new 1 or 2-year contract!
 - **If you do NOT like the new rate**, choose **not to renew**. WGL will continue to service your home until the end of your contract. Once your contract ends, you will be able to choose a new supplier to service your home with 100% wind power or return to your utility's standard offer service.
 - **Pricing comparison is [here](#) through the MD Office of People's Counsel.**
 - Make sure the renewable energy company/product is [Green-e certified](#)
 - Make sure it is a fixed rate contract – variable rate contracts can get expensive
 - Make sure there are no monthly fees and check renewal terms/cancellations fees.

If you do not take any action (accept or reject the renewal rate) **at least 25 days prior to the end of your term**, WGL Energy will automatically renew your contract at the price that they quoted you.
